Description

We analyzed Baltic *Corynosoma* material (*C. magdaleni* Montreuil, 1958, *C. semerme* (Forssell, 1904) Lühe, 1911 and *C. strumosum* (Rudolphi, 1802) Lühe, 1904) from grey (*Halichoerus grypus*) and ringed seals (*Pusa hispida*) for the variation of hook morphology and for finding possible morphotypes, by using the proboscis profiler (Wayland 2010) and Meristogram (Wayland 2016).
