Description

The survey "Health on equal terms?" is a national survey, conducted every year since 2004. The Public Health Agency is responsible for the survey and Statistics Sweden (SCB) is responsible for the distribution, collection and registration. During the data collection in 2006, Region Västra Götaland ordered an additional sample for Västra Götaland County.

The additional sample in 2006 included all individuals aged 16-84 years living in Västra Götaland County. A total of 21,075 individuals answered the questionnaire, representing a response rate of 59,1 percent.

The questionnaire was printed in two versions. Addition to the national public health questionnaire, a similar questionnaire was conducted including the EQ-5D instrument. The questionnaire with the EQ-5D instrument was sent to the additional sample in Västra Götaland County. The national questionnaire consisted a total of 134 questions and the questionnaire including the EQ-5D instrument consisted a total of 136 questions. Both questionnaires covered issues of health, lifestyle, economic conditions, work and employment, and security and social relations. In addition to data collected through the questionnaires, registry data were also included.

Purpose:

The aim of the national survey was to investigate the health in the population and to show changes in the population's health over time as a follow up of the national health politics. The aim of the additional sample in Västra Götaland County was to investigate the health in the population in Västra Götaland County.

Unit of analysis

[Individual](#)

Population

Individuals aged 16-84 years living in Västra Götaland County.

Time Method

[Longitudinal: Trend/Repeated cross-section](#)

Sampling procedure

[Probability: Stratified](#)

[Probability: Simple random](#)

Urvalsramen i denna undersökning har skapats utifrån Registret över totalbefolkningen (RTB) och består av samtliga folkbokförda i Västra Götalands län i åldern 16-84 år. Antalet individer i ramen var 1 200 205 den 31/1 2006.

Det nationella urvalet drogs först genom ett obundet slumpmässigt urval. Sedan drogs ett stratifierat obundet slumpmässigt urval i Västra Götaland så att den bestämda urvalsstorleken per stratum uppnåddes. Mer information finns att läsa i Teknisk rapport.

Time period(s) investigated

2006-03-27 - 2006-06-19

Number of individuals/objects

21075

Response rate/participation rate

59.1%
