

Contrast enhanced ultrasound of carotid artery plaques

SND-ID: ext0210-1.

Creator/Principal investigator(s)

Göran Bergström

Research principal

[University of Gothenburg](#) - Institute of Medicine

Description

The study sample collected between 2009-2013 consist of in vivo images and data analyses of asymptomatic and symptomatic carotid atherosclerotic plaques.

Purpose:

In vivo imaging of carotid plaque using contrast enhanced ultrasound. The aim is to quantify the vascularization of carotid plaques.

Time period(s) investigated

2009 - 2013
