Description

The study tries to find out what interaction there is between employees working situation and working conditions and their perception of and attitudes towards different types of changes in society. The study is made in two steps, first all 1294 respondents answered the questionnaire and then 164 of them were interviewed in the second step.

Data contains personal data

No

Language

Unit of analysis

[Individual](#)

Population

Employees in the counties of Stockholm and Kopparberg, working at places with at least ten employees.

Time Method

[Cross-section](#)

Sampling procedure

Som ett första urvalssteg drogs slumpvis ur CFR, centrala företagsregistret, ett antal arbetsplatser med minst 10 anställda ifrån de två länen. Dessa arbetsplatser kontaktades och med deras hjälp anskaffades listor över de anställda. Företagen indelades i grupper efter storlek, och via ett

stratifierat urval drogs ett antal anställda som fick ta emot ett frågeformulär.

Time period(s) investigated

1976-01-01 - 1977-02-01
