Description

This is the second study in the series of SOM-surveys carried out in Western Sweden exclusively. The questionnaire was divided into six subject fields: mass media; politics and society; the municipality of Göteborg; energy, nuclear power and environment; leisure and housing; and background. Many of the questions are replications of questions asked in SOM-survey Western Sweden 1992 (SSD 0460), but there is also a number of new questions. These questions dealt with time spent listening to the radio, viewing morning television and reading morning paper; impression of morning television; amount of local government issues read in the local paper; confidence in a number of Swedish mass media; opinion on a number of statements concerning the regional division of Sweden. Respondents living in Göteborg had to answer a number of questions dealing with the magazine 'Vårt Göteborg', published by Göteborg local authority. Other questions specific for respondents living in Göteborg dealt with the neighbourhood committees and their activities. Respondents also had to give their opinion on a number of proposals concerning local environmental issues. Furthermore they had to indicate how often they had participated in a number of leisure activities the last twelve months.

Purpose:

Study attitudes and behaviors that are linked to local and regional issues and phenomena

Data contains personal data

No

Language
