Description

The study comprises five stories told in the Bantu language Kagulu of Tanzania. The stories are available as sound recordings as well as glossed transcriptions. However, the transcriptions do not closely follow the sound recordings but have been normalised in cooperation with a native speaker.

Purpose:

The general aim is to document the Tanzanian minority language Kagulu.

The dataset contains three sound recordings in wave format, three text files containing transcriptions and translations of the sound recordings, one text document explaining the abbreviations used in the glosses and a spreadsheet containing metadata.
