Description

In order to identify how the evolution of society affects Swedes' attitudes and behaviour, the SOM Institute started its National SOM study in 1986. National SOM addresses three areas - society, opinion and mass media - and consists of several parallel surveys. All surveys include a large number of questions related to politics, society, media and social background, but their areas of focus differ.

In 2018, six different questionnaires were distributed.

Purpose:

The main purpose is to establish time series that enable researchers to analyse how various changes in society affect people's attitudes and behaviour.

Language

Data collection 1

- Mode of collection: Self-administered questionnaire
- Time period(s) for data collection: 2018-09-25 - 2018-12-31
- Data collector: Institutet för kvalitetsindikatorer - Indikator
- Sample size: 21000
- Cause of non response - No contact/refusal: 9479
- Cause of non response - Respondent unable to participate: 726
- Source of the data: Population group
