## Description

We sought to assess the measurement properties of items aimed at operationalizing participation in care by next of kin, applied in nursing homes.

Data file 1: SPSS file (.sav) with sex, age category, contact person, 37 items aimed to capture participation in care.

Data file 2: Excel (.xlsx) transformation tables from raw total scores, to linear logits, to linearised total scores with the same range as the original scores.

Data file 3: File (.rum) for Rasch model analysis, prepared for RUMM2030.

## Language

## Unit of analysis

[Individual/Patient](#)

## Population

next of kin of older people in nursing homes

## Study design

Cross-sectional study

## Description of study design

Cross-sectional study, questionnaire, psychometric analysis, Rasch analysis

## Sampling procedure
