## Description

The information in the abstract is translated from the archaeological report:

The Swedish National Heritage Board's Contract Archaeology Service UV Öst have, during the spring of 2001, conducted field evaluations of a number of ancient monuments in the area of Linköping Airport. The investigations were prompted by the upcoming development in connection with the take-off and landing runway. The ancient remains consisted of single graves and groups of graves, located on the remaining heights that currently surround the airport. The investigations showed that the three sites were burial grounds, while one site consisted of a smaller group of graves. In essence, the graves are dated to the Early Iron Age. Several of the sites also contained findings from the Mesolithic.

Purpose:

The information in the purpose is translated from the archaeological report:

The field evaluations aimed at clarifying the nature and the burial customs of the recorded graves and burial grounds, as well as any new-found ancient remains within the areas. The aim was also to demarcate the archaeological areas and to assess the extent of the remains in them. The results will also be used as a basis for assessing subsequent outcome study needs.

The ZIP file consist of GIS files and an Access database with information about the excavations, findings and other metadata about the archaeological survey.

## Data contains personal data

No

## Language

[Swedish](#)

## Time period(s) investigated

[Early iron age - Early iron age](#)
