Description

The information in the abstract is translated from the archaeological report: During autumn 2001, the National Heritage Board's Contract Archaeology Service UV Öst performed an archaeological excavation of three archaeological sites in Svartådalen. The excavation was initiated due to a rebuilding and expansion of National Road 32, the between Boxholm and Bleckenstad. The total area of the three sites was ca. 9000 m² and the investigated archaeological remains consisted mainly of settlement remains from the Neolithic and Early Iron Age, as well as a grave from the Early Iron Age. The surroundings primarily include remains from the Early Iron Age; stone wall systems, single graves and grave fields.

Purpose:

The information in the purpose is translated from the archaeological report: Prior to the planned reconstruction and expansion of National Road 32 between Boxholm and Bleckenstad, the National Heritage Board's Contract Archaeology Service UV Öst have examined three archaeological sites in Öringe and Bleckenstad (RAÄ 332 respectively RAÄ 109, 111:2).

The ZIP file consist of GIS files and an Access database with information about the excavations, findings and other metadata about the archaeological survey.
