Description

The information in the abstract is translated from the archaeological report:

Due to the planned construction of a single-family house, the Swedish National Heritage Board's contract archaeology division, UV Öst, has performed a preliminary investigation in the village of Stora Aska, Slaka parish, Linköping municipality. No prehistoric or medieval features or finds were discovered.

Purpose:

The information in the purpose is translated from the archaeological report:

The purpose of the preliminary investigation was to determine whether there were any archaeological remains on the affected heights and to find a location for the planned house, that would cause as little damage on the potential remains as possible. The aim of the investigation was also to determine the extent and type of the archaeological remains and, if possible, to date them.

The ZIP file consists of GIS files and an Access database with information about the excavations, findings and other metadata about the archaeological survey.
