Description

The information in the abstract is translated from the archaeological report:

Due to planned construction of a 3G base station, the Swedish National Heritage Board's contract archaeology division, UV Öst, has performed preliminary investigations within two areas partly covering the so-called Pryssgården settlement site, RAÄ 166, in Östra Eneby parish, Norrköping. In area 1, located within the RAÄ 166 site and nearby the demolished vicarage of Östra Eneby, settlement remains such as pits and post holes were found. No features or finds were discovered within area 2.

Purpose:

The information in the purpose is translated from the archaeological report:

The purpose of the preliminary investigation was to determine the type and intensity of the archaeological remains and, if possible, to delimit and date the remains.

The ZIP file consist of GIS files and an Access database with information about the excavations, findings and other metadata about the archaeological survey.
