Översikt

Typ	European Social Survey
Identifikation	SND0988-001
Version	Produktionsdatum2015-12-14 1.0
Serie	The European Social Survey (ESS) is an academically driven cross-national survey that has been conducted every two years across Europe since 2001. The survey measures the attitudes, beliefs and behaviour patterns of diverse populations in more than thirty nations.
	The questionnaire includes two main sections, a core module which remains relatively constant from round to round, plus two or more 'rotating' modules, repeated at intervals. The core module aims to monitor change and continuity in a wide range of social variables, including media use, social and public trust; political interest and participation; socio-political orientations, governance and efficacy; moral, political and social values; social exclusion, national, ethnic and religious allegiances; well-being, health and security; demographics and socio-economics. In addition, a supplementary questionnaire is presented to respondents at the end of the main interview. The first part of this questionnaire is a human values scale (part of the core), while the second is devoted to measures to help evaluate the reliability and validity of items in the main questionnaire.

Sammanfattning

This survey is the Swedish part of the 2014 'European Social Survey ' (ESS), and is focusing on democracy and personal and social well-being. The survey also includes data on media and social trust, politics, subjective well-being, household characteristics and socio-demographics as well as human values as part of the core module of ESS.

Typ av data	Survey data: Independent surveys
Analysenhet	Individual

Räckvidd och täckning

Nyckelord	behavior, social attitudes, values, political behaviour, survey data
Ämnesområden	social behaviour and attitudes, mass political behaviour, attitudes/opinion, employment, mass media, elections, social and occupational mobility, religion and values, gender and gender roles, family life and marriage
Tidsperiod(er)	2014-2014
Länder	Sweden

Population

Individuals aged 15 years or older

Urval

Urvalsprocess

Sampling frame used is the register of the population, which includes all individuals living in Sweden. The register is updated continuously. Individuals that do not reside on the address stated in the register will be traced through the use of complimentary registers. The sampling frame includes those living in institutions, since there is no way to filter them. Sampling procedure is one-stage equal probability sample without clustering. Fully random sample of individuals (equal probability selection) born before 15 years + at start of survey.

Probability sample: Simple random sample
