Cooperation between CESSDA archives and NSIs: Country report of the Netherlands

Marion Wittenberg
CESSDA expert seminar Gothenburg 16-17 September 2010
Country report of the Netherlands

• Cooperation between Statistics Netherlands (CBS) and DANS
• Availability of CBS data
Cooperation between CBS and DANS

- 1994: Scientific Statistics Agency (WSA)
- Special annual DANS budget for CBS data and projects
- Secured micro data available at DANS
- Special projects:
  - Dutch Censuses 1795-1971
  - Negotiations
Secured data available at DANS

Driven by data
CBS data in our EASY system
Secured micro data via DANS

• Data are not in our archive (other access)
• CDRom
• DANS settles the contracts
• Free of charge for researchers
Special project:
Dutch Censuses

Welcome

Welcome to the 1795-1971 Dutch Censuses website. This website enables you to view or download most of the Dutch census tables, published in the period 1795-1971. Besides, most of the instructions and attachments (see documentation) are online available. The original records were scanned and digitized and are now available as images as well as MS Excel tables. In addition to the Excel record tables, this site includes many of the original census documents in Adobe PDF format.

Since 1997, the digitization of the data was accomplished during the course of three projects: Dutch Census Digitization 1795-1971, Dutch Census Data and Life Courses in Context. As a result of these three projects over 40,000 record pages were made digitally available to the public.

Please note that all files available on this site are files under construction. Which means that the control process of the files is not yet completed. We welcome your comments and your suggestions.

Future of the project

Data Archiving and Networked Services (DANS) participates in the completion of the 1795-1971 Dutch Censuses project. The missing tables are being corrected and shall be added to the website in due time. DANS is recently involved in evaluation of the results of a digitization test of handwritten census tables from the archive of the Statistics Netherlands. Images of the tables from the census of 1947 have already been made available through this website. If the OCR processing of the
Availability of CBS data

- DANS: Secured micro data (free of charge)
- DANS: Historical census data (free of charge)
- CBS: Remote access to micro data (costs)
- CBS: On site access to micro data (costs)
- CBS: Statline (aggregated data) (free of charge)
CBS micro data only available to

- Researchers at institutes which have been given the relevant authorisation under the Statistics Netherlands Act
- Via an official authorisation issued by the Central Commission for Statistics (CCS)
- Only available to researchers who are officially employed, not for students
- Statline is available to everybody
Remote access and on site

- Researcher has to come to CBS or has to use a special secure internet connection
- Preliminary interview with CBS to discuss the aim and the feasibility
- Possibility to link own data
- Results are checked for the risk of disclosure
- Costs will be charged for the use of the facilities and services
In 2008, the proportion of women in management positions in senior and academic occupations was 28 percent.
### Labour force by sex

**Table explanation:** Changed on August 16, 2010. Frequency: quarterly.

#### Subjects

<table>
